

# GTCC Summer Institute 2017

Workshop 1701	
<b>TITLE:</b>	<i>Art Integration</i>
<b>DESCRIPTION:</b>	The two-day workshop uses a Blended-Learning model in working collaboratively in acquiring knowledge and skills in arts integration, arts education advocacy, and arts education research and policy for assisting teachers for the enrichment of learning in their classrooms. Teachers will learn art based instructional tools in music, dance, visual arts and drama to ignite creativity, and engage in positive teaching experiences. Teachers will learn about the current research in arts education and apply this research in project based learning activities in order to understand and experience how the arts can build critical thinking skills and habits of mind that lead to future success. Arts integration uses the arts to draw on students prior knowledge provides hands-on learning with authentic problems for students to solve in different ways, creates opportunities for students to learn from each other to enhance their understanding in core subjects. Teachers will learn how to use arts integration to engage students in reflection about what they have learned, how they learned it, and what this learning means to them through arts integration. Teachers will learn to use student assessment of their own peers' work as part of the learning process experience. Teachers will learn to use arts integration to provide opportunities to use revision in student's work and to share it with others to build a positive learning environment where students are encouraged and supported to take risks, explore possibilities, and use a social and cooperative learning environment to enhance learning through collaboration.
